
θ = 1, β_fa ∈ {0, 0.2}, E, M ∈ {5, …, 1000}
Measured coverage (late window)
Predicted coverage
TTL, Eq. (app-ttl)
FIFO, Eq. (app-fifo)
Inexactness of E → M/β (300-seed replay)
Prediction − measured FIFO coverage
q_j = ν_j r_j/β
M = 5: E → M/β
M = 5: exact
M = 10: E → M/β
M = 10: exact
M = 20: E → M/β
M = 20: exact
